# SECTION 6. CONDITIONS OF CONTRACT AND CONTRACT FORMS

#### **Preface**

- This Section includes two types of standard contract forms for: A Lump-Sum Contract and a Time-Based Contract. Each type includes General Conditions of Contract ("GCC") that shall not be modified, and Special Conditions of Contract ("SCC"). The SCC includes clauses specific to each contract to supplement, but not over-write or otherwise contradict, the General Conditions of Contract.
- 2. Lump-Sum Contract. This type of contract is used mainly for assignments in which the scope and the duration of the Services and the required output of the Consultant are clearly defined. Payments are linked to outputs (deliverables) such as draft or final reports, drawings, bill of quantities, bidding documents, or software programs. Lump-sum contracts are easier to administer because they operate on the principle of a fixed price for a fixed scope, and payments are due on clearly specified out putsand milestones. Nevertheless, quality control of the Consultant's outputs by the Procuring Entity s paramount.
- 3. Time-Based Contract. This type of contract is appropriate when it is difficult to defineor fix the scope and the duration of the services, either because they are related toactivities carried out by others for which the completion period may vary, or becausethe input of the consultants required for attaining the objectives of the assignment difficult to assess. In time-based contracts the Consultant provides services on a timed basis according to quality specifications, and Consultant's remuneration is determined on the basis of the time actually spent by the Consultant in carrying outthe Services and is based on (i) agreed upon unit rates for the Consultant's experts multiplied by the actual time spent by the experts in executing the assignment, and
  - (ii) reimbursable expenses using actual expenses and/or agreed unit prices. This typeof contract requires the Procuring Entity to closely supervise the Consultant and tobe involved in the daily execution of the assignment.
- 4. The templates are designed for use in assignments with consulting firms and shall not be used for contracting of individual experts. In some consultancy assignments such as design and construction supervision, both Lump- Sum and Time-Based Contracts are used and signed with the Consultant. In that case, the Lump-Sum Contract wouldapply for the design part of the Services while the construction supervision partwould be based on a Time- Based Contract. In such event, both types of contracts shall be signed at the same time.
